

1st grade CCC, Mexico.

There is some prep work for this project- photocopying & cutting the images to color, and cutting the black construction paper to mount the colored images. The finished projects are used as decorations and are hung in the MPR for the festival. The projects should be completed the Wednesday before the CCC. The completed projects should be left in the classroom with the teacher. The decorations chair will pick up projects from teacher.

Again I used to prep the copies and construction paper for the folders myself, but you can pass that job along as long as you give the volunteers a heads up. If you want to have the volunteers do the cutting, we may just want to buy a paper cutter for the closet? Let me know.
